Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Groups I, claim(s) 1-4, 6, 9-13, 15-17, and 20-22, drawn to a process of making an alkylaromatic hydrocarbons.

Group II, claim(s) 23-25, drawn to an alkylaromatic hydrocarbon composition.

Group III, claim(s) 26-28, drawn to a process of making an alkylaryl sulfonate mixture.

Group IV, claim(s) 29-31, drawn to an alkylaryl sulfonate mixture.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical features which are common to all of claims in groups such as having at least 12 carbons atoms and an average of from 0.8 to 2.0 C1-C3 alkyl branches per chain are all taught or rendered obvious by Blain et al (5,026,933). Specially , attention is drawn to the abstract; column 5, lines 35-40; examples. Therefore, since the limitations of claims in groups fail to define a contribution over US 5,026,933 they fail to constitute a special technical feature and hence there is lack of unity between groups of claims.

Group I contains claims directed to more than one species of the generic invention.

These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species A: (a1) homogeneous acid catalyst and (a2) heterogeneous acid catalyst.

Subspecies (a1): HF and phosphoric acid.

Subspecies (a2): including MCM-22, PSH-3, SSZ-25, ERB-1, ITQ-1, MCM-36, MCM-49 and MCM-56.

Applicant is required, in reply to this action, to elect a single species and a single subspecies to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 1

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The homogeneous acid catalyst and the heterogeneous acid catalyst in claim 1 have nothing in common (lacking of unity). Similarly, subspecies, zeolites in claims 13, HF and phosphoric acid in claim 20 have nothing in common. Secondly, US 5,026,933 discloses the limitation of claims of group I. Hence, since claims fails to define a contribution over the cited reference, there is no special technical feature and the cited species and subspecies lack unity of invention.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species and subspecies or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
